

**NORTHWESTERN CONNECTICUT COMMUNITY COLLEGE  
COURSE SYLLABUS**

**Course Title: DIGITAL IMAGING**

**Course #: ART 270**

**Course Description:**

*3 semester hours (6 studio/lab hours)*

The basis of this Digital Imaging course is the modification of photographic images through the use of computer technology. Over the next fifteen weeks you'll learn a broad range of digital darkroom skills and you'll engage a variety of creative issues. One of my core concepts is that computer technology is no less an art medium than traditional photography, oil paint or a sculptor's chisel. Just as with these traditional artistic mediums, once an artist has gained facility with Digital Imaging, that artist's creative capacities and opportunities have been greatly expanded. Ultimately Digital Imaging is just like any other art course: it requires you to active engage your lifelong task of locating, understanding and developing your creative self.

**Pre-requisite/Co-requisite:** ART 142

**Goals:**

Students will gain an understanding of and facility with digital image processing as means of further extending their photographic skills and expanding their expressive capabilities. Through discussion, critique and through the continual development of an artist's statement, students will gain fluency in visual arts discourse and distill a sense of identity and motivation with regard to their own work.

**Outcomes:**

1. Students will apply proper techniques for inputting images into a computer.
2. Students will be able to creatively explore image manipulation, image editing and painting using computer software.
3. Students will apply proper digital imaging output techniques using inkjet printers and various papers.
4. Students will be able to speak fluently regarding their own creative identity and motivations, as well as regarding interpretations and critiques of the works of other photographers.
